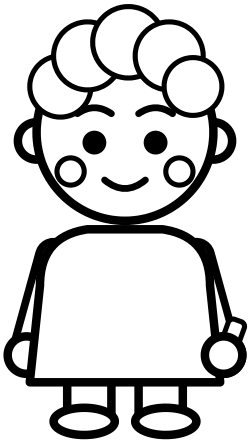
Try it! Where does a puddle go?



1. After it rains, find a puddle.
2. Trace all the way around it with sidewalk chalk.
3. Come back at lunchtime and trace it again.
4. Check one more time before dinner.

Morning	Lunchtime	Before dinner

Draw your puddle each time you check!

What happened to your puddle?

_____

_____

The sun warms the water, and it floats up into the air in teeny, tiny bits, too tiny to see. That's called evaporation!
